LIGHT TO LIVE BY

We create high-quality, sustainable LED lights for homes, offices and every space in between. Lights people can be proud to switch on because they look great, lift the soul and are gentle on the planet.

THE CREATORS OF BEAUTIFUL, SUSTAINABLE LIGHTING.

Tala was founded in 2015 by Josh, Max and William. Three university friends who believed great design was the fastest way to a low-carbon planet. Since then, we've become one of the leading lights in design-led, sustainable lighting.

A team of engineers, designers and low-carbon pioneers, proud to be creating lights that are gentle on the planet, make homes look great and make life feel brighter.

We push the boundaries of design x technology

Our LED bulbs are built with performance and impact in mind.

With every product we design, we're driving our industry closer to a low carbon future.

We draw inspiration from nature

Tapping into 4.5 billion years of research and development as a platform for creativity and innovation.

We build sustainability into every product

Low energy is good. Low carbon and low impact is better. Circularity and repairability are the future.

We collaborate

Working with like-minded folk brings an energy we thrive on. We work with others who believe in the positive power of sustainable lighting. We're the preferred LED light-source supplier for some of the most celebrated lighting brands worldwide.

We choose suppliers with integrity

We choose responsibly sourced, recyclable materials like aluminium and hardwoods. We avoid plastic at all costs.

Certified

Corporation

This company meets high standards of social and environmental impact.

DESIGN-LED LIGHTS FOR A BRIGHTER FUTURE.

We're supporting the move to low-carbon. One light at a time.

- + Tala LED bulbs use 90% less energy than incandescent equivalents
- + Tala LED light sources have a lifespan of between 15,000–30,000 hours, or approx. 5–10 years in a residential environment
- + By using Tala LED bulbs rather than incandescent or halogen equivalents, users can prevent significant amounts of CO₂ from entering the atmosphere. Moreover, the efficiency and longevity of Tala bulbs will help to reduce energy bills and lower the users' carbon footprint
- + Tala fixtures use responsibly sourced and recyclable materials, such as hardwoods and aluminium

AMAZING PRODUCTIONS AND FRAMPTON & BALDING

As designers we naturally want to create the best looking lights on the planet, but that's just half the story.

Through every product we make, we want to use the power of design to show how brilliant low-carbon living can be. The low-energy revolution is happening. We're proud to be leading the charge.

@tala

We encourage our customers to share photos of their Tala lights on Instagram.

22kg / 48.50lb

SYCAMORE

Inspired by the elegant fall of the sycamore tree's helicopter seeds, the Sycamore Chandelier features glass wings that gently curve over a brass frame, capturing the seed's translucent quality. These wings are perfectly poised to gather both natural daylight and the warm evening glow from Tala's bulbs.

This chandelier features part-recycled glass shades and a brushed solid brass fixture, available in three-tier or five-tier options. It is paired with Sphere III dim-to-warm bulbs. The design includes a custom solid brass ball and socket joint, allowing the chandelier to adjust up to 45 degrees for a perfect fit in any space.

The fixture uses fixed rod hanging with rods measuring 230mm, 330mm, and 430mm, allowing for a maximum drop length of 1085mm from ceiling to pendant. Additional rods can be purchased if further adjustment is needed. Maximum drop height is 5 meters / 16 feet.

MAGMA

Magma is an innovative new light series from Tala, melding sophisticated design with upcycled materials to achieve a gentle diffusion of light.

Distinguished by its decorative glass disc diffuser made from upcycled glass waste, the Magma range features hand-polished solid brass frames and mounts, alongside Tala's Dim to Warm light sources.

This combination delivers a premium aesthetic with beautiful, diffused illumination.

- + Premium alternative to mined materials like alabaster with unique optical quality
- + Diffuser disc manufactured in Germany
- + Custom G70 matte white Dim to Warm bulbs
- + Solid brass fixture
- + Available as Flush mount or Wall light
- + ADA compliant design, under 4in from wall

“Magma was designed to embody the beauty of circular materials.”

- ZOE STARK, DESIGNER

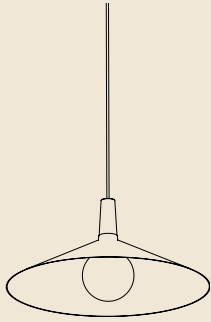

Made from 100% recycled glass, this material aligns with Tala's commitment to sustainability. It reduces landfill waste and promotes circular economy practices.

The production process follows stringent environmental standards (EN ISO 14025, EN 15804), ensuring minimal environmental impact throughout the product lifecycle.

BOWER PENDANTS

Expertly spun from steel in Yorkshire, United Kingdom, this debut pendant system is powder coated in distinctive, high-gloss colourways and features an anodised aluminium pendant.

Designed to hang individually or in a uniform row, the Bower embraces the traditional shaded form to offer a crisp, graphic aesthetic that is both fresh and familiar.

- + **Circular + Modular:** The assembly references traditional industrial manufacturing processes, separating the pendant from the shade to ensure longer life and reparability over time
- + **Three sizes, Three colourways:** Available in Small, Medium and Large in Dark Green, Yellow and White
- + **Boasting optimised geometries** to showcase the dim to warm capabilities of the Tala light bulb

Bower: A pleasant shady place under trees or climbing plants in a garden or wood .

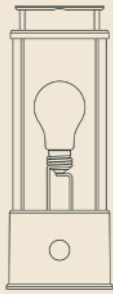

Optimised geometry to work with a wide range of bulbs. Each bulb offers a different look and bulb depth.

Wedge-shaped pendant design offers a simple friction fit for all shade shapes. The hole size on the shade determines how low it sits on the pendant.

THE MUSE IN SOLID BRASS

The Muse in Solid Brass is a special edition of the original portable lamp design.

Celebrating the beauty of raw materials, the lamp is made from cast solid brass which is hand-polished to achieve the luxury finish. Its considerable weight lends a further air of luxury.

The first version of The Muse to be made without Farrow & Ball's custom colours, this edition references the signature brass finish found in other Tala fixtures, while creating something wholly unique.

+ Special
edition

TALA x FARROW & BALL

The Muse is a collaboration between two pioneering and sustainable British brands, mixing exclusive Farrow & Ball colours with Tala lighting technology.

The Muse recalls the promise and grandeur of the British pleasure garden to create timeless lighting solutions for the home, outdoors, or on the move.

tala®

“Just like the Muse itself, the colours have been designed to stand the test of time and to feel instantly at home wherever you set them down.”

- CHARLOTTE COSBY, HEAD OF CREATIVE AT FARROW & BALL

THE MUSE

The most advanced portable LED lamp on the market, The Muse has a battery life of up to 24 hours and delivers a warm dimmable light throw no matter the weather.

- + Tala's first truly portable lamp
- + Exclusive Farrow & Ball colourways
- + IP44 rated – built for the British outdoors
- + Classic lantern aesthetic
- + Cordless long-life battery (up to 24hrs)
- + Custom solid brass dimmer with knurled texture
- + Dim to Warm LED light
- + Repairable for longer life and less waste
- + USB-C + Wireless charging
- + IP44 wet-rated for outdoor use
- + Replaceable Tala bulb and battery pack
- + Borosilicate glass, Aluminium shell and solid Brass hardware
- + CRI 97 LED light
- + Selvedge and Setting Plaster colourways exclusive to Tala, online and in-store

BERT & MAY / SAMUEL HEATH

THE MUSE WALL LIGHT

An extension of the portable lamp series, The Muse Wall Light continues the aesthetic theme and recalls the sconce-style light fixtures synonymous with the 18th and 19th Centuries.

The Dim to Warm behaviour of the bulb can be controlled via the rotary dimmer dial on the face of the lamp, or by switching to wall control upon installation.

- + IP44 wet-rated – suitable for outdoors and bathrooms
- + Replaceable custom LED bulb
- + Dim to Warm technology
- + Cast aluminium housing and solid brass detailing
- + Dimmable using the knurled brass dial, or from a centralised system (configurable upon setup)
- + Four custom Farrow & Ball colourways

KILTER

Named in reference to the careful confluence of light source and fixture, the Kilter range is found at the intersection of decorative and architectural lighting.

Comprised of the Kilter Pendant, Kilter Wall Light and light sources Kilter I and II, this series is our first venture into S14d lighting solutions. This version of the popular form features a light frosted finish to subtly exposes the internal filament when illuminated, while reducing the dark spots often found at the ends of a typical S14d bulb.

ALUMINA PENDANTS

An extension of the Alumina Lamp series released in November 2020, the Alumina Pendants also draw inspiration from the White City in Tel Aviv.

For the pendant edition, the five colourways of the Lamp series were narrowed down to the popular and versatile 'Chalk' finish, referencing most closely the classic curved design and white surface finish of the architecture.

- + Built from lightweight aluminium
- + Complete with textured chalk white powder-coat finish
- + Grey and white speckled braided cable
- + Designed with a concealed neck to sit flush to the custom Sphere V bulb
- + Available in Single, Triple and Nine Pendant configurations
- + Also available as standalone fixtures
- + Ideal in minimal or bold interior settings

ALUMINA SINGLE PENDANT - CHALK

ALUMINA NINE PENDANT - CHALK
CP-CHK-SET-NON-ALM-01-EU / CP-CHK-SET-NON-ALM-01-US

“We combined a soft chalky texture with clean geometry to highlight the delicate relationship between bulb and pendant.”

- DANIEL CARPENTER, SENIOR DESIGNER

Shaped from a solid cylinder of aluminium, the bold form is balanced by the modest, chalk-white finish, enabling it to be displayed in minimal spaces or with striking colour schemes.

Designed with a concealed neck to showcase the form of the new Sphere V bulb and its in-built Dim to Warm technology.

ALUMINA

+ Wall mountable

ALUMINA LAMP - SAGE
ALM-SPHR-IV-SGE-TBL-01-EU /
ALM-SPHR-IV-SGE-TBL-01-US

Alumina is made from lightweight aluminium, which has excellent recyclability potential and is one of earth's most abundant metals.

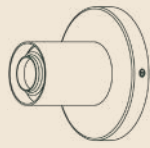

Catering for the modern dweller, we adapted the design to allow users to fix their lamp to the wall.

In doing so, it offers a multitude of uses and the ability to display Alumina throughout an interior space.

LOCHAN

BASALT

Drawing from millions of years of organic construction, the Basalt range references the shape found in the thousands of extruded basalt columns that make up the Giant's Causeway in Northern Ireland.

Through expertly crafted Brass and Stainless Steel, together with mouth-blown borosilicate glass, Basalt achieves a truly unique aesthetic to accompany its arcane origin story.

- + Crafted from sand casted Brass and lost-wax casted Stainless Steel
- + Translucent mouth-blown borosilicate glass
- + Consistent colour rendering of more than CRI 90
- + Black and grey braided cable
- + Subtle Tala logo detail on the pendant

DAVID WEEKS FOR TALA

For our seminal international design collaboration, we conjured a series of lighting concepts with legendary New York designer, David Weeks.

Known as the 'godfather of New York lighting design', David Weeks's minimalist visual language articulates an ongoing, and open-ended, dialogue between material and form. Together with our London-based design team, this collaboration marries New York modernism with British ingenuity, casting our most celebrated bulbs in a whole new light.

ECHO

Echo is all about structure and form. Inspired by our Sphere IV bulbs, the Echo range is notable for its strong, angular steel framing. Featuring a Table and Floor lamp, plus a dramatic and elegant Chandelier, this range will soon sit amongst the world's very best lighting designs.

- + Refined tubular steel structure
- + Custom rotary dimmer
- + Dim to Warm technology
- + Echo products come pre-packed with Sphere IV bulbs

TRIPLE PENDANTS

From the high-end to the mid-range, our Triple Pendants cater for specifiers and homeowners of all backgrounds, budgets and expectations.

The simple installation, adjustable cable length and multiple canopy options make this an ideal lighting solution for the modern interior.

- + Pre-assembled with Brass, Graphite, Oak and Walnut pendants
- + Complete with 3m/9.8ft black braided cable, adjustable to suit any space
- + Available in circular and linear formations
- + Fine material finish and detailing
- + Perfectly suited for kitchen islands and dining tables
- + Available as standalone fixtures or pre-paired with Voronoi II or Sphere IV LED bulbs

**The light bulb is
the protagonist.**

THE LIGHT BULB

Light is a kind of energy. As part of the electromagnetic spectrum, it is a primary tool for perceiving the world and communicating within it.

We see every product and every story through the prism of the light bulb. It is the first consideration and the last.

Save money and time

Use less energy and spend less time replacing bulbs

Experience smooth dimming to <5%

We are pursuing perfection in Dim to Warm technology

Unique shapes and stories

Our most popular bulbs are hand-assembled and use mouth-blown glass

Prevent carbon emissions

Each Tala bulb can prevent the emission of 0.3 metric tonnes of carbon

Achieve true colour representation

We consistently achieve CRI 95

Produce less waste

We celebrate the retrofittable bulb, so no fixtures need to go to landfill with integrated electronics

VORONOI

Designed to push the design of the light bulb to its limits, the Voronoi range is Tala's most recognisable and celebrated light source family.

Taking inspiration from the intricate mathematical patterns found in nature - the forest canopy, a giraffe's coat, the veins of a leaf - the three Voronoi bulbs are an iconic feature of our lighting collection.

- + Made from mouth-blown borosilicate glass
- + Hand-assembled LED filaments
- + No two bulbs the same
- + Original patented design

SPHERE

Available in five distinct sizes the Sphere family of bulbs will provide a perfect lighting solution for almost any fixture.

Ranging between 4.6 and 8 Watts, and achieving 250-720 lumens, the Sphere bulbs combine a strong and smooth light output with limited energy use.

- SPHERE I**

PORCELAIN

The Porcelain range is centred around four distinct shapes based on primary geometries.

Individually mouth-blown from borosilicate glass, each matte white bulb creates a striking silhouette when turned off, and a soft and serene light when turned on.

- + Mouth-blown borosilicate glass
- + Distinctive shapes
- + Matte white finish
- + High lumen output

TECHNICAL LIGHT SOURCES

Drawing on the engineering excellence that defines Tala's core offering, the Light Engine range, as well as the GU10 and G9 light sources, represent the pinnacle of technical LED light sources.

- + Light Engines offer high power Dim to Warm light at CRI 95
- + G9 and GU10 provide gallery grade lighting at CRI 97, R9 90-97
- + GU10 offers Dim to Warm light at 2200-2800K
- + All dimmable and exhibit <5% flicker
- + Suitable for enclosed fixtures

CORE

Core is a range of recessed directional light fixtures from Tala. Utilising conventional forms for a universal appeal, these architectural light fixtures deliver gallery-grade lighting for any interior space.

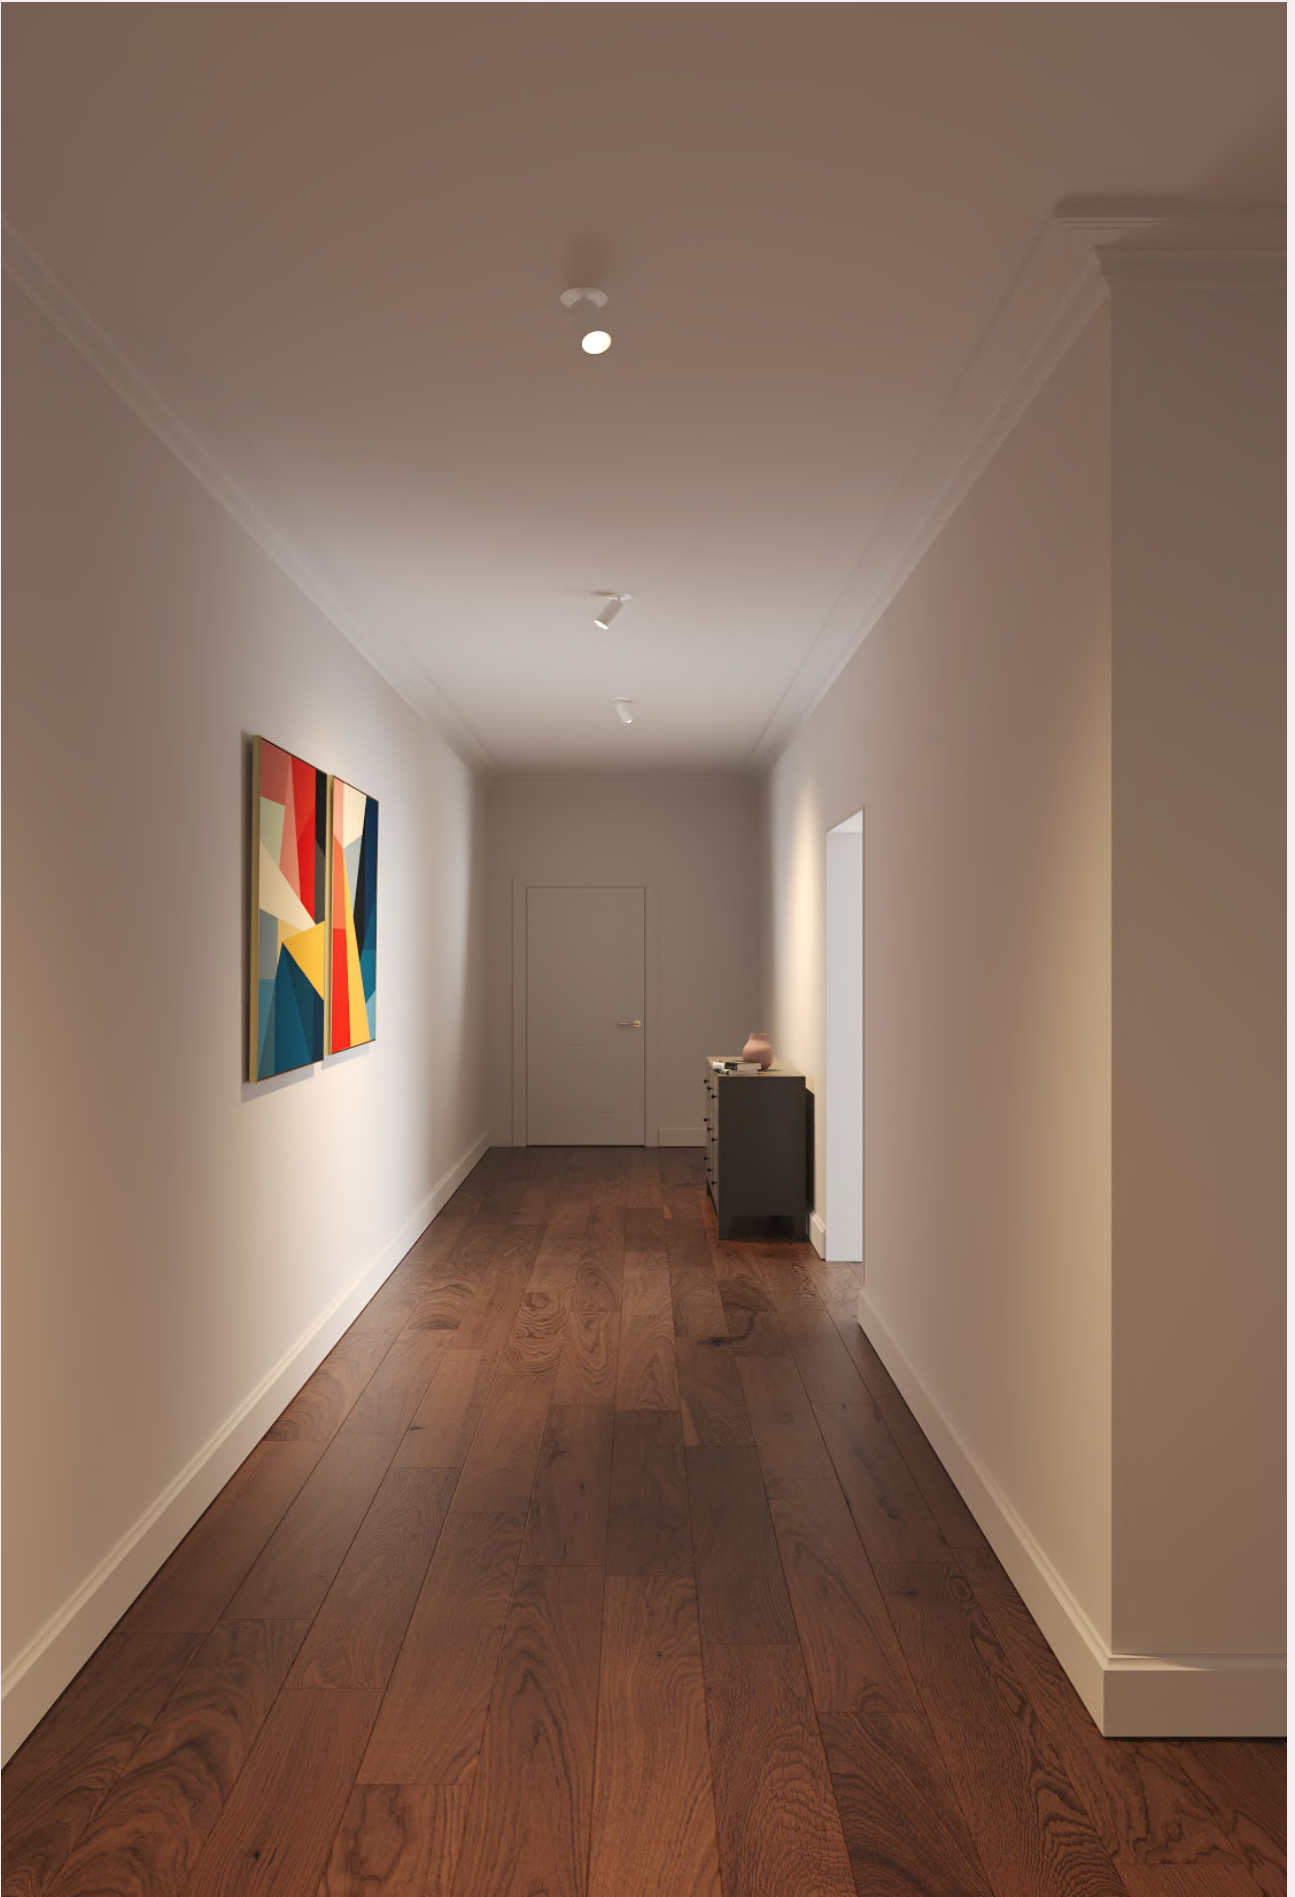

Available as a Spotlight and Downlight, Core champions simplicity through modular componentry, modest detailing, and easy installation features to allow for adaptability and replaceability over time.

- + Featuring an adjustable angle of 90-350 degrees
- + Easily replaceable light source
- + High performance lighting solution
- + Stylish and functional addition
- + Easy installation and adaptability over time

INSPIRATION

With over three million customers worldwide, there are a myriad of ways our lights have been displayed: from dramatic hallways and dining rooms to designer stores, bedrooms, breweries and barn conversions.
