

FontanaArte

MILANO 1932

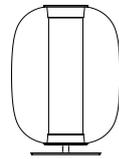

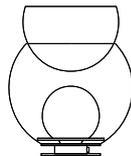

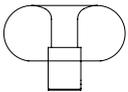

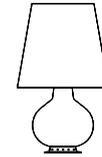

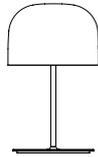

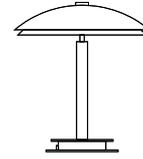

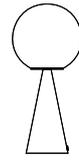

USA PRICE LIST 2026

FontanaArte was founded in Milan in 1932, originating in an encounter between Gio Ponti (the great 20th-century maestro of Italian architecture), Luigi Fontana (entrepreneur of sheet glass) and Pietro Chiesa (a master glass artisan). FontanaArte accompanied Italy's exploration of modernity, where glass and metal expressed a new idea of beauty infused with light and transparency. The history of FontanaArte is distinguished by lamps and every type of object that brought light into the inhabited space. This timeless mission has been passed down from icon to new product.

ASHANGHAI

Max Ingrand, 1955

This extremely elegant table lamp was designed by Max Ingrand in 1955, during the period when this French maestro was artistic director at FontanaArte. Chromed brass joints hold together five tubes made of transparent borosilicate glass that form a series of intersections supporting the lamp.

Table lamp with diffused light and dimmable by switch button. Frame in chrome-plated brass. Main diffuser in white acid-etched cased blown glass. Top of diffuser in float glass sheet sandblasted on both sides. Base made from transparent borosilicate glass. Fixing points in chrome-plated brass. Transparent power cable, dimmer and plug. European two-pole plug.

BIANCA

Matti Klenell, 2015

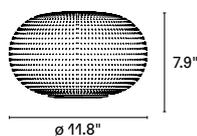

Bianca is a family of luminaires with the decoration on the diffuser surface features an orderly series of shallow delicate grooves etched into the white glass, yielding an effect resembling small footprints on fresh snow. Mouth blown and dipped in acid to obtain the distinctive 'silk effect' typical of fine glassware, Bianca diffusers are available in three different diameters to complete all types of luminaires belonging to the family.

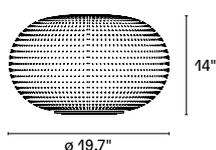

Table lamp with diffused light. Glass diffuser made of milky white cased glass, blown and satinfinished. White metal base. Transparent plug and power cord. European two-pole plug.

BILIA

Gio Ponti, 1932

Nothing more than a sphere, set in an apparently impossible feat of balance, upon a cone that serves as the base. One of Gio Ponti's many compositional magic tricks, designed in 1932. The counterbalancing of two elementary geometric forms results in an original, perfectly proportioned object.

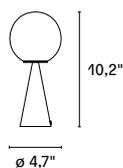

Table lamp with diffused light. Frame made in metal. Diffuser made of white blown glass with satin-finish. Transparent power cable and plug. The Rechargeable version have a integrated dimmable LED light source, with a single button for switching on/off and adjusting brightness levels. The lamp is powered by a portable battery that provides up to 5 hours of autonomy at full brightness and 15 hours at minimum brightness. Recharging takes 4 hours via the included USB cable.

BIS / TRIS

Historical Archive, 1954

Designed in 1954, the Bis and Tris table lamps maintain their classic yet contemporary shape intact. Designed for a refined home environment, they also find their perfect location on a work table or on an elegant console.

Table lamp with direct light not dimmable. Lower diffuser in white sandblasted glass. BIS, polished brass frame. Bowl in black opaline glass, sandblasted and black interior finish. TRIS, chromed metal frame. Glass bowl, sandblasted and white interior finish. Black power cable, plug and switch. European two-pole plug.

BLOM

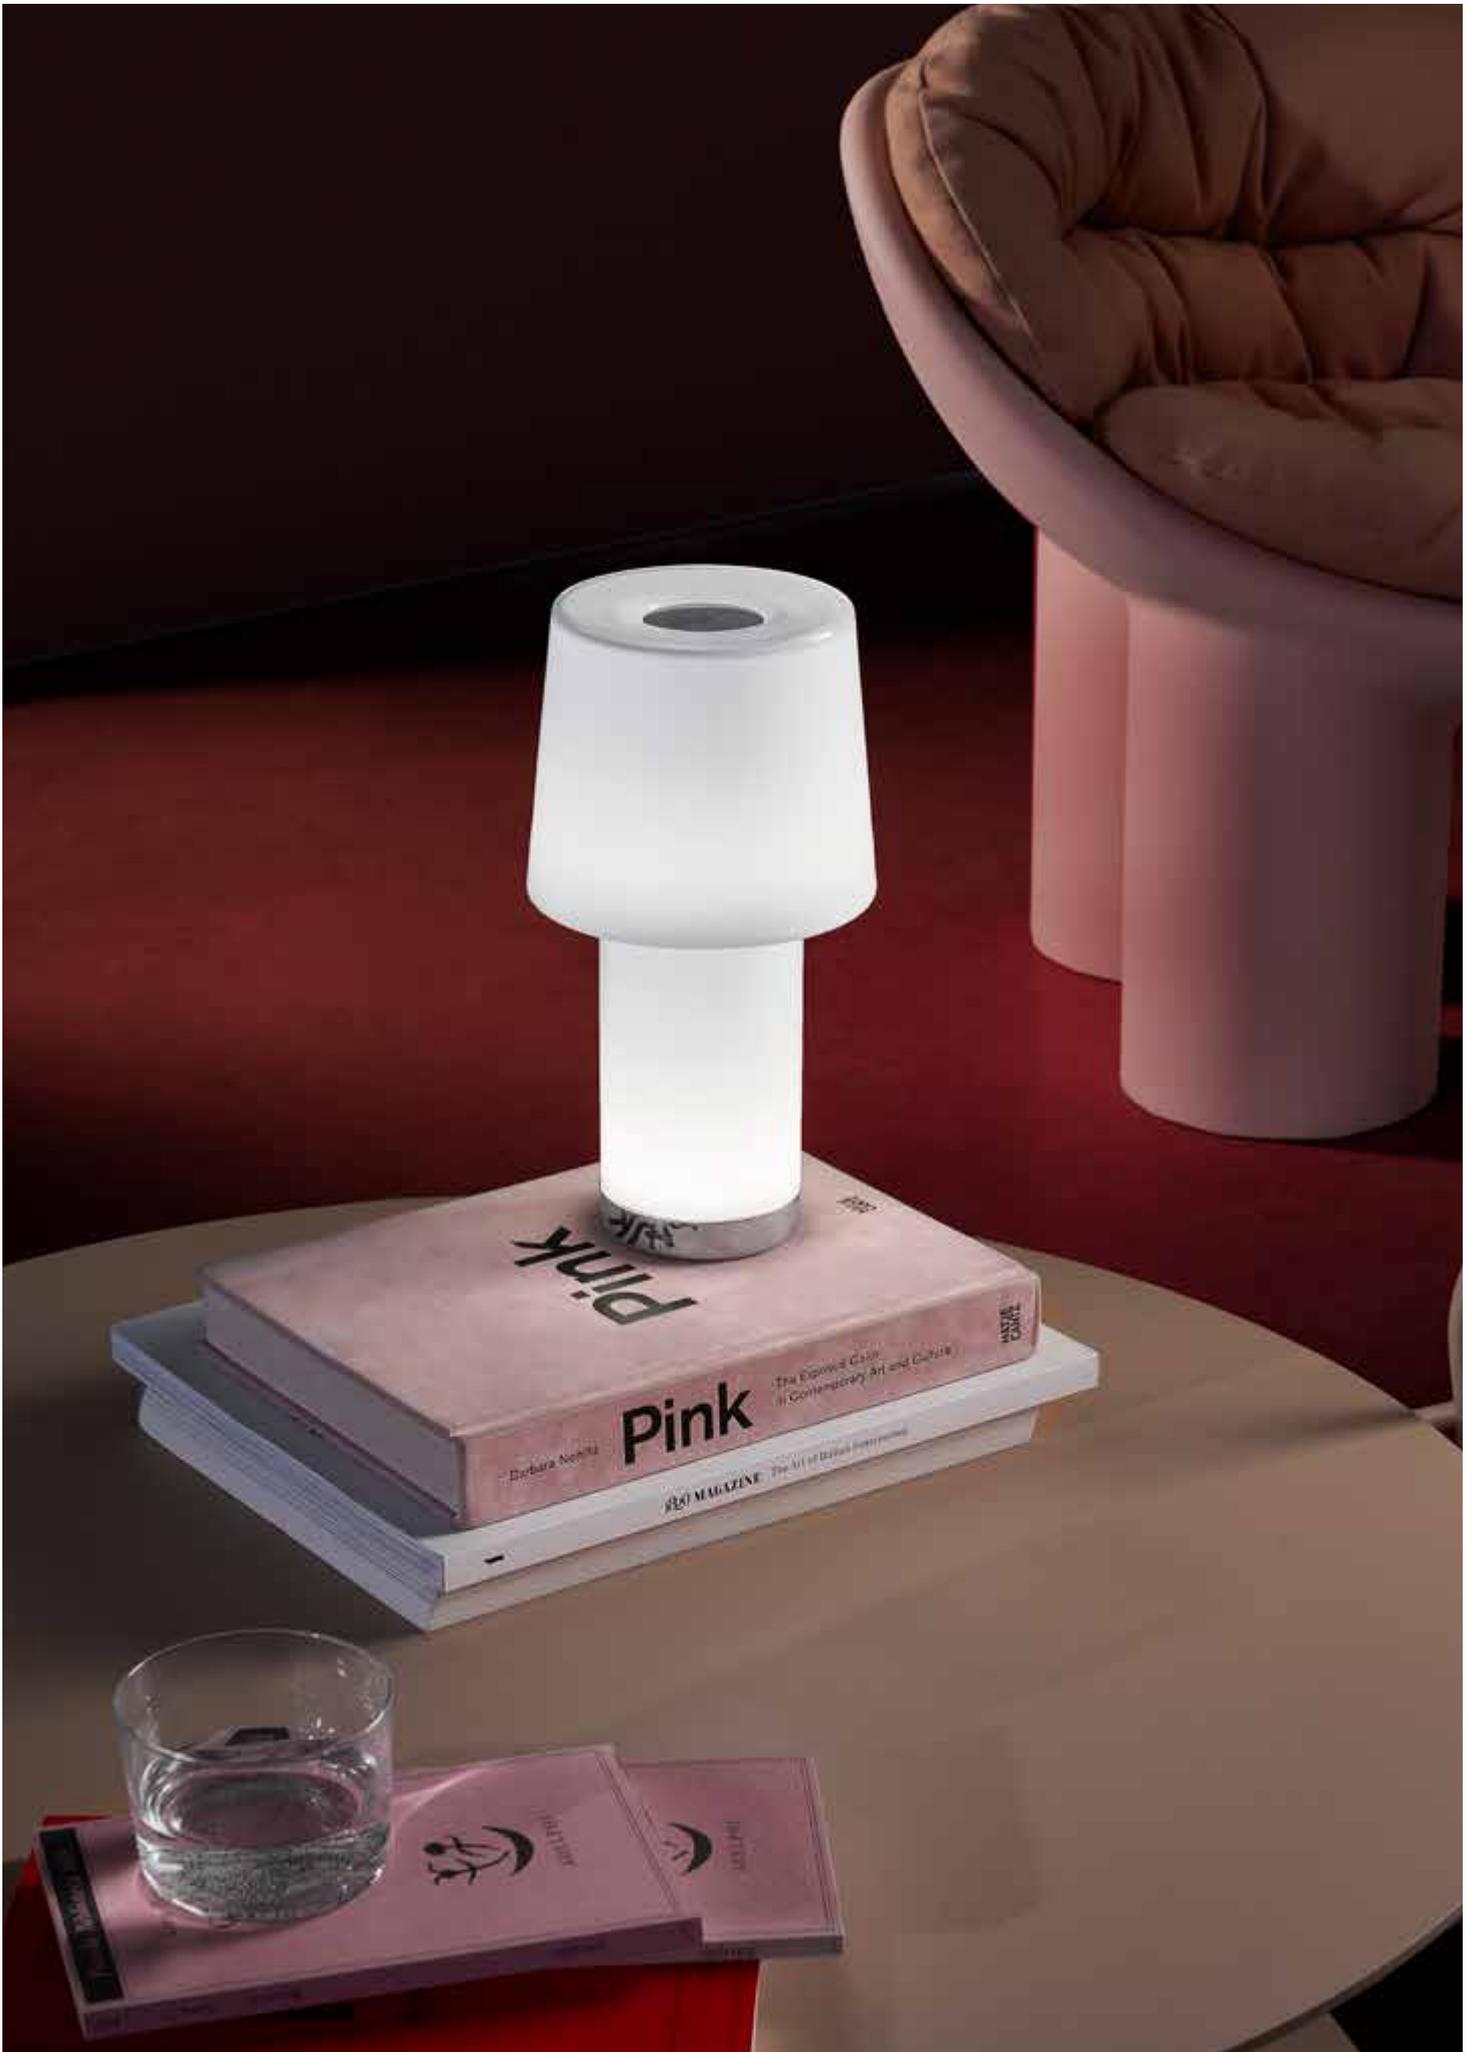

Andreas Engesvik, 2013

The name derives from the shape of the lamp which, with petal-like blades, is reminiscent of a flower. The amount of light is adjustable thanks to the two petals that gently wrap around the diffuser and which, by rotating on the base, allow the luminous flux to be shielded, customising it according to requirements.

Table lamp with diffused light adjustable by moving the petals. Frame made of painted aluminium with polycarbonate petals. Diffuser made of milk-white and opaline polyethylene. Transparent power cable, plug and switch

CAMEO

Claesson Koivisto Rune, 2023

Just as when we speak of a 'cameo' in a film or play, we mean the brief and discreet appearance of a famous character, in the same way CAMEO is a lamp with character and personality, essential and fundamental in its function without being the star of the room.

Rechargeable table lamp, made of blown glass. Available in two versions: glossy white blown glass paired with a chrome metal frame, and satin-finished blown glass paired with a satin gold painted metal frame. The decorative metal ring, positioned on the diffuser, is made of the same material and finish as the base and features the serigraphed FontanaArte logo. A transparent touch button allows switching on and off and adjusting the light intensity. The lamp is powered by an 8-hour battery and rechargeable via a cable with USB plug included in the package. Plug-in power supply not included in the package. Indoor/outdoor use.

CHESHIRE

GamFratesi, 2013

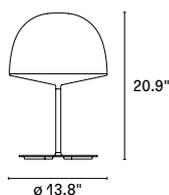

Riflette l'impronta nordica dello studio nella semplicità dell'estetica e della funzionalità. La calotta è di policarbonato opalino per favorire l'emissione diffusa; colorato per diffondere la luce verso il basso nella versione da tavolo e da terra oppure opalina nella versione sospesa.

Lampada da tavolo a luce diretta non dimmerabile. Diffusore inferiore opalino. Paralume in policarbonato, stelo e base in metallo. Cavo, interruttore e spina trasparenti. Spina europea due poli.

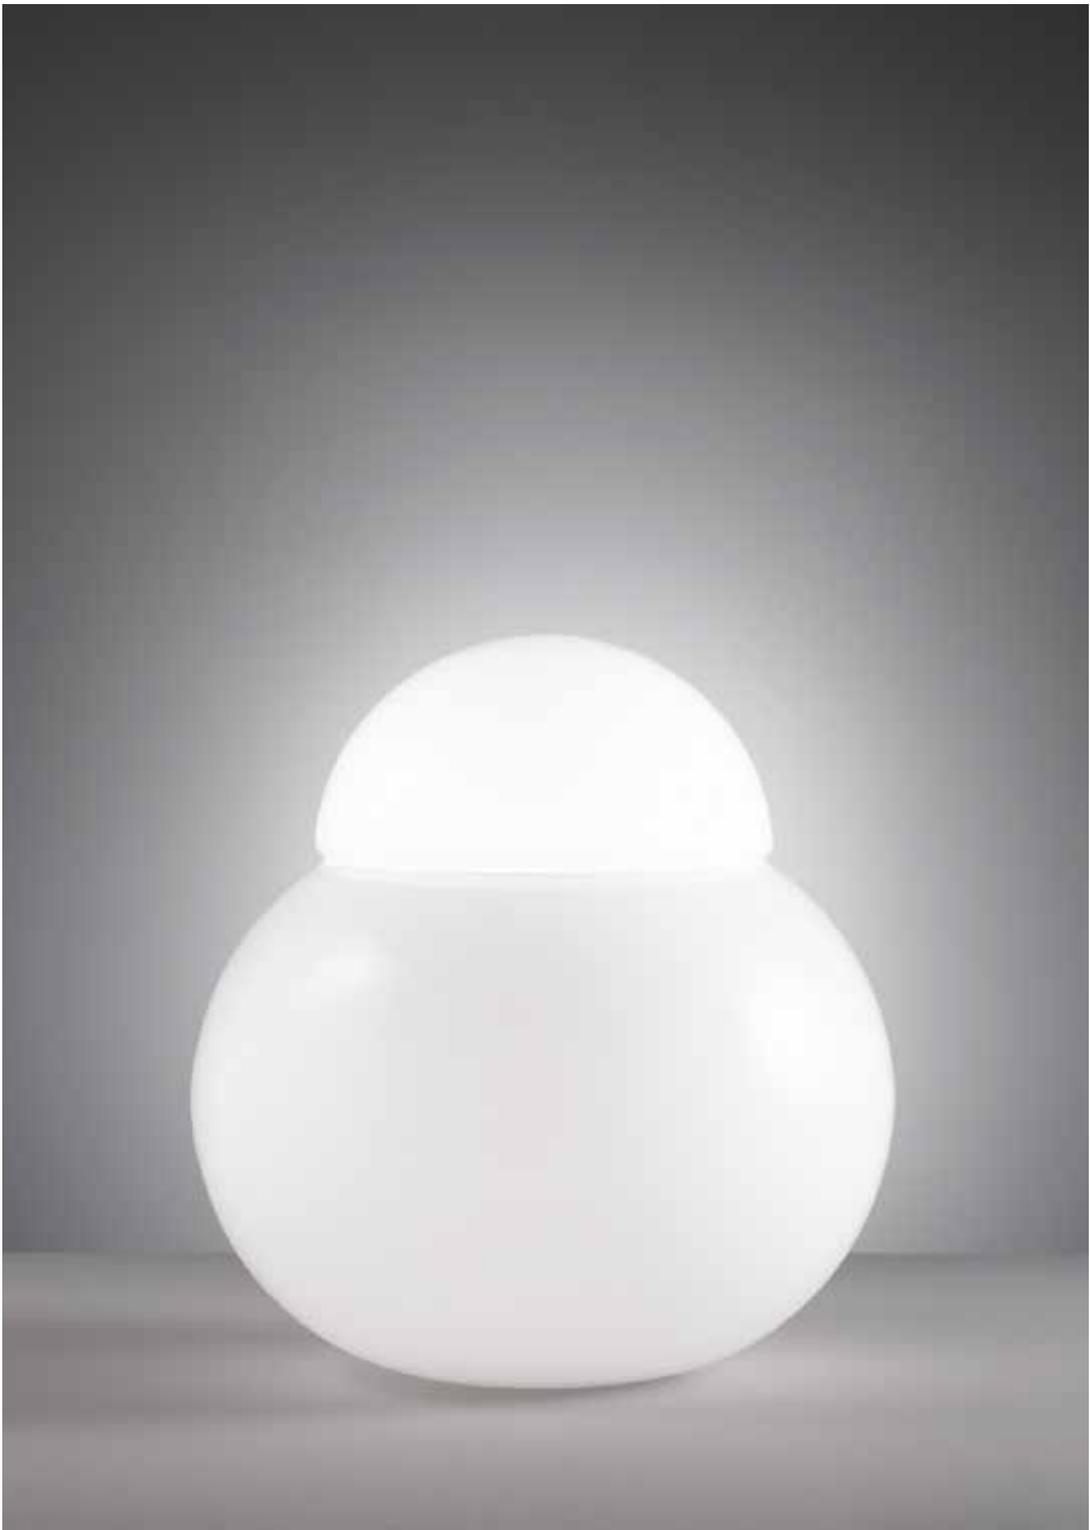

It reflects the firm's Nordic imprint in the simplicity of aesthetics and functionality. The dome is made of opal polycarbonate to encourage diffuse emission; coloured to diffuse the light downwards in the table and floor versions or opal in the suspended version.

Table lamp providing direct non-dimmable light. Opal lower diffuser. Polycarbonate shade, metal stem and base. Transparent cable, switch and plug. Two-pole European plug.

DARUMA

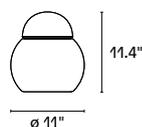

Sergio Asti, 1968

Daruma was born like this. Two glossy white blown glass caps overlapping each other, where the rigour of the white volumes gives it, when switched off, the elegant beauty of a vase, but once switched on, animates it with different luminosity and colours, more intense in the upper part and softer in the lower part; an effect due to the choice of placing the light source in the lamp cap. In this way, the double thickness of the glass refracts different intensities, creating soft and welcoming lighting effects.

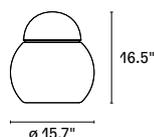

Table lamp providing diffused, non-dimmable light. Glossy white blown glass diffusers. Black power cable, switch and plug. Two-pin European plug. Light source not included.

EQUATORE

Gabriele e Oscar Buratti, 2017

A contemporary reinterpretation of the classic lamp with glass shade. While in traditional abat-jours the diffuser houses the light source inside, in this family of lamps the diffuser is paradoxically and suggestively empty and the luminous effect is produced by two luminous discs within a central metal band, visible on the lampshade and recalling the line of the equator.

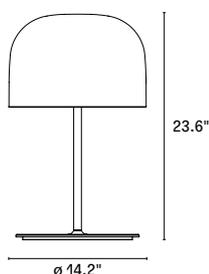

Table lamp with dimmable diffused light produced by LEDs inserted inside two superimposed polycarbonate discs. The lower disc produces a downward light emission, the upper one illuminates the coloured glass canopy. Metal frame. Glass diffuser. Black power cable, dimmer and plug. Power supply on plug with interchangeable plugs (uk - usa - europe).

FONTANA 1853

Max Ingrand, 1954

The first timeless design object symbol, still a best seller and timeless icon, Fontana represents the abat-jour par excellence. The peculiarity of Fontana is its multiple lighting: both the base and the shade contain one or more light sources. The differentiated switching enables several lighting needs to be met: from the soft glow of the resting light, to the intense reading light up to an emotional and ambient light, obtained by indirect emission.

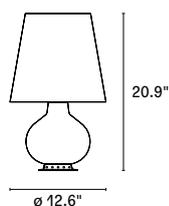

Non-dimmable table lamp. Painted metal fitting. Satin-blown glass diffuser and base. Black power cable, switch and plug.

FONTANELLA

Federico Peri, 2020

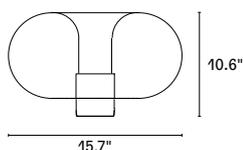

Two materials: metal and glass, in the historical tradition of FontanaArte. The metal serves as a base and contains the light source, while the glass, the true protagonist of the project, is skilfully worked by skilled artisans in a process of fusion between a portion of transparent glass and a satin-finished one from which the light diffuses. Fontanella is formed by joining two pieces of glass: the inner tube is threaded, sandblasted and finally joined with the blown glass in the shape of a bubble.

Table lamp with dimmable diffused light. Galvanized metal frame. Borosilicate blown glass diffuser. Transparent power cable, dimmer and plug.

GIOVA

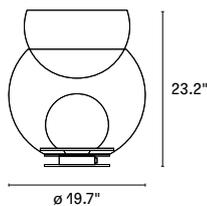

Gae Aulenti, 1964

A hybrid between a vase and a lamp, Giova marks Gae Aulenti's debut in the field of designer lighting. Available in two sizes, it is a true light sculpture. A transparent globe is positioned on a metal base, which includes the internal sphere housing the light source.

Table lamp providing diffused, non-dimmable light. Metal fitting. Transparent blown glass central sphere. Glossy white blown glass inner sphere. Transparent coloured blown glass upper hemisphere. Black power cable, switch and plug. Two-pin European plug.

MANO

Pietro Chiesa, 1932

An ironic and elegant lamp designed by Pietro Chiesa in 1932, the year in which he began his project of artistic direction in FontanaArte, shared with Gio Ponti. Pioneer of irony and originality for those times, Mano is still among the most sought after pieces by design enthusiasts all over the world.

Dimmable table lamp. Marble powder and resin base and square metal stem, both painted 'soft' matt black. White marble powder and resin hand. Black fabric diffuser internally laminated with white PVC. Black power cable, switch and plug. Two-pin European plug.

Code	Material	Colour	Light source	Dimmer	Prezzo no IVA Price VAT excluded

MERIDIANO

Gabriele e Oscar Buratti, 2020

Passing through opal, coloured and transparent layers, emphasised by the refined curves and magic of blown glass, light is free to create surprising and fascinating effects, patterns and atmospheres. In Meridiano, the vertical cylindrical tube contains and diffuses light in the transparent glass capsule, which defines its refined ovoid shape.

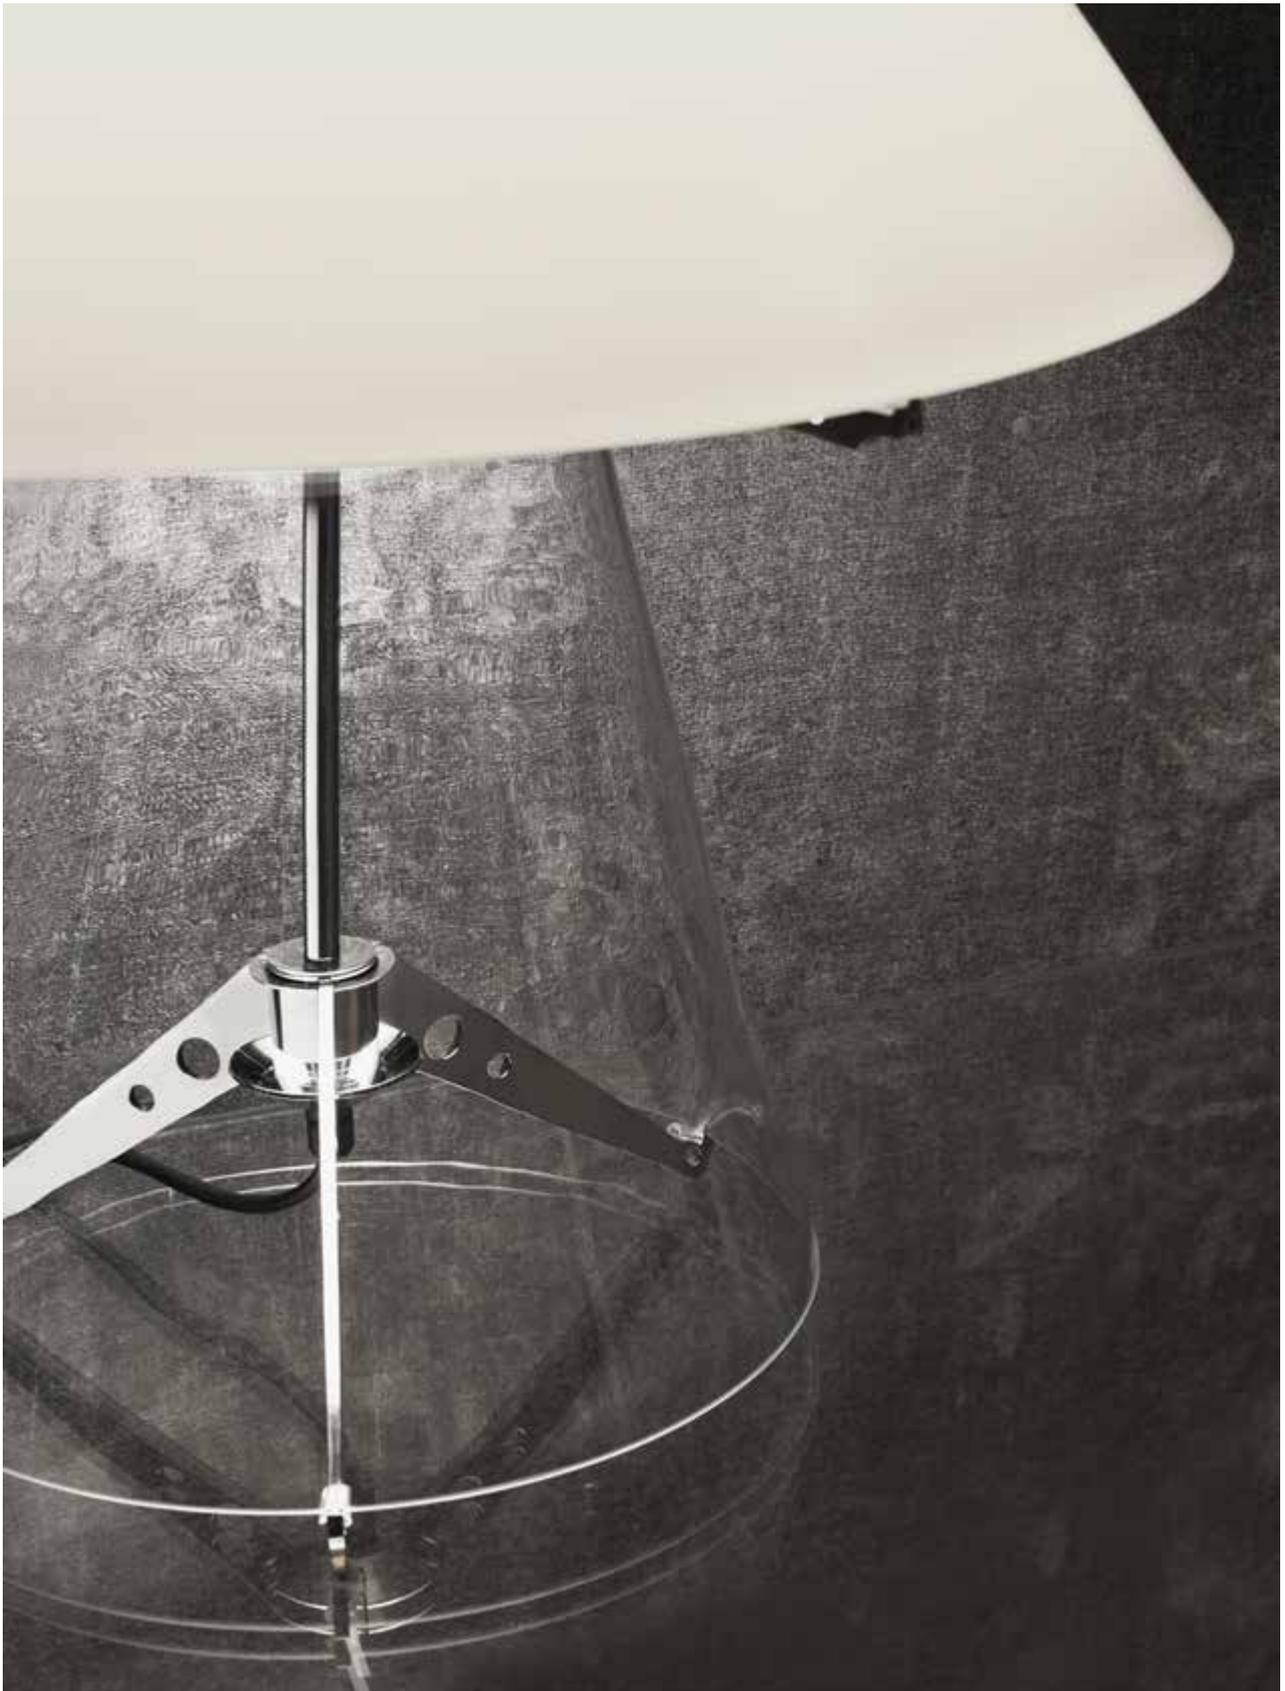

Table lamp providing diffused dimmable light. Nickel-plated metal fitting. Blown glass outer diffuser. Internally painted Pyrex glass diffuser. Black power cable, dimmer and plug. Power supply on plug with interchangeable plugs (uk - usa - europe).

METAFORA

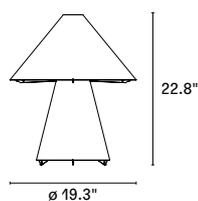

Umberto Riva, 1980

Una lampada da tavolo preziosa, composta da un diffusore conico a strati di vetro opalino, sorretto da una base in vetro trasparente che cela la struttura in metallo, tutta a incastro. Un oggetto di natura fortemente decorativa, prodotto con tecniche produttive tradizionali come la soffiatura a bocca del vetro.

Lampada da tavolo a luce diffusa dimmerabile. Montatura in metallo cromato. Base in vetro soffiato trasparente. Diffusore in vetro soffiato lucido colorato in pasta. Cavo, dimmer e spina trasparenti. Spina europea due poli.

A precious table lamp, composed of a conical diffuser with layers of opaline glass, supported by a transparent glass base that conceals the metal structure, all interlocking. An object of a highly decorative nature, produced using traditional production techniques such as mouth-blowing glass.

Table lamp providing diffused dimmable light. Chrome metal fitting. Transparent blown glass base. Paste-dyed polished blown glass diffuser. Transparent cable, dimmer and plug. Two-pole European plug.

NASKA

Historical Archive, 1933

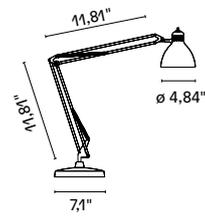

Naska è la lampada da scrivania per eccellenza, l'originale capostipite di tutte le lampade da tavolo con braccio bilanciato a molle. Un oggetto senza tempo, adatto sia per gli spazi domestici che per quelli dedicati al lavoro.

Lampada da tavolo non dimmerabile. Base e stelo in acciaio. Parabola in alluminio. Accensione tramite interruttore a rotazione posto sulla testa del diffusore. Cavo e spina neri. Spina europea due poli.

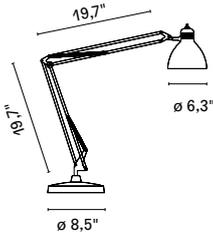

Naska is the desk lamp par excellence, the original progenitor of all table lamps with a spring-balanced arm. A timeless object, suitable for both home and work spaces.

Non-dimmable table lamp. Steel base and stem. Aluminium parabola. Switched on via rotary switch on the diffuser head. Black cable and plug. Two-pin European plug.

PINECONE

Paola Navone, 2016

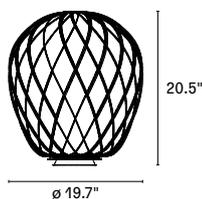

Pinecone is a pendant and floor lamp with a diffuser made using the ancient technique of caged blown glass. The master glassmaker blows the glass bubble into a metal cage, which partially contains its expansion, creating a tension effect between the glass and the cage. The latter is further enhanced by a galvanic treatment that makes it shiny and brilliant.

Table lamp providing diffused dimmable light. Caged blown glass diffuser. Galvanised metal cage and base. Transparent power cable, dimmer and plug.

RE & REGINA

Bobo Piccoli, 1968 Re-Edition

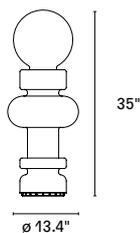

Inspired by the game of chess with their soft, sinuous shapes King and Queen are the key characters of the chessboard. Their profiles stand out sharply in the white light diffused by the opalescent glass. Vertical King, screwed around a wide horizontal Regina circumference. They can be placed side by side, or recall each other from different points in a room, or even proceed independently, each of these lamps has its own personality.

Table or floor lamps providing diffused dimmable light. Painted metal fitting. Satin-blown glass diffuser. Black power cable, dimmer and plug. Power supply on plug with interchangeable plugs (europe - usa).

SETAREH

Francesco Librizzi, 2017

The lamp consists of a sphere magically suspended within a slender metal structure. An interplay of masses and circular trajectories generates a balanced pattern of gravitational dynamics. The light emanating from the sphere spreads over the surrounding space and irradiates the frame. The reflections of the metal make the light field visible, the space influenced by the light, its aura.

Dimmable diffused light table lamp. Galvanised metal fitting. Marble base. Spherical diffuser in opaline satin-finish blown glass and upper bell-shaped diffuser painted internally and satin-finish externally. Black power cable, dimmer and plug. Power supply on plug with interchangeable plugs (uk - usa - europe).

VOLÈE

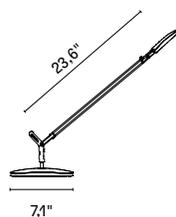

Odo Fioravanti, 2016

Volée is a Led luminaire of the latest generation, in which the formal research is combined with technological innovation. Featured by an essential design, Volée switches on with an almost tennis-style gesture: a simple wave of the hand under the head of this lamp activates an electronic device that switches the light on or off without any contact.

Table lamp with direct light. A touch sensor over the head allows the flow of light to be regulated to different levels of intensity. A simple wave of the hand under the head of this lamp activates an electronic device that switches the light on/off without any contact. Frame consist of a head and of structural rods made of painted aluminium. Black power cable and plug. Plug-in power supply with interchangeable plugs (uk - usa - europe).

BIANCA

Matti Klenell, 2015

Bianca is a family of luminaires with the decoration on the diffuser surface features an orderly series of shallow delicate grooves etched into the white glass, yielding an effect resembling small footprints on fresh snow. Mouth blown and dipped in acid to obtain the distinctive 'silk effect' typical of fine glassware, Bianca diffusers are available in three different diameters to complete all types of luminaires belonging to the family.

Floor lamp with diffused and dimmable light with sliding switch. Milk-white diffuser made of blown glass with satin-finish. Painted metal frame. Transparent power cable, dimmer and plug.

EQUATORE

Gabriele e Oscar Buratti, 2017

A contemporary reinterpretation of the classic lamp with glass shade. While in traditional abat-jours the diffuser houses the light source inside, in this family of lamps the diffuser is paradoxically and suggestively empty and the luminous effect is produced by two luminous discs within a central metal band, visible on the lampshade and recalling the line of the equator.

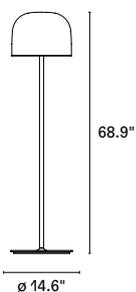

Floor lamp with diffused and dimmable light generated by led inserted into two overlapping polycarbonate discs. The bottom disc directs the light output downward, the upper one illuminates the glass cap. Painted metal frame. Diffuser made of transparent and coloured glass. Black power cable, dimmer and plug. Plug-in power supply with interchangeable plugs (UK - USA - UE).

YUMI

Shigeru Ban, 2011

Yumi means bow in Japanese. Today, this simple shape is re-interpreted by Shigeru Ban for FontanaArte. Its absolute harmony is destined to turn into a new universal classic. Yumi is both delicate and strong: an essential sign that meets a resistant and light structure.

Floor lamp with direct and dimmable light. Painted metal frame and base. Black power cable, dimmer and plug. Plug-in power supply with interchangeable plugs (UK - USA - UE).

BIANCA

Matti Klenell, 2015

Bianca is a family of luminaires with the decoration on the diffuser surface features an orderly series of shallow delicate grooves etched into the white glass, yielding an effect resembling small footprints on fresh snow. Mouth blown and dipped in acid to obtain the distinctive 'silk effect' typical of fine glassware, Bianca diffusers are available in three different diameters to complete all types of luminaires belonging to the family.

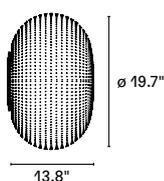

Wall/ceiling lamp providing diffused dimmable light. Satin-blown, milk-white layered glass diffuser. Painted metal fitting.

Integrated LED

BONNET

Odo Fioravanti, 2014

With its elegant sinuous shape, Bonnet is the new LED lamp that reworks the concept of indirect lighting. The top part conceals a small yet very powerful LED source whose ray of light is mainly directly upwards onto the wall and ceiling. The designer also wanted to play with the parasite light that is normally lost, recuperating it with a lens and directing it downwards. In this way, Bonnet not only lights itself up but also produces a downwards glow.

Wall lamp with indirect light dimmable. Frame made of painted die-cast aluminium.

IO

Claesson Koivisto Rune, 2015

In the shape of a small curved lunar disc, IO is a wall light with dual Led light emission. IO appears almost suspended, very close to the wall but never close enough to touch it; positioned at a distance that allows the light to gently caress the wall with an intimate skimming effect.

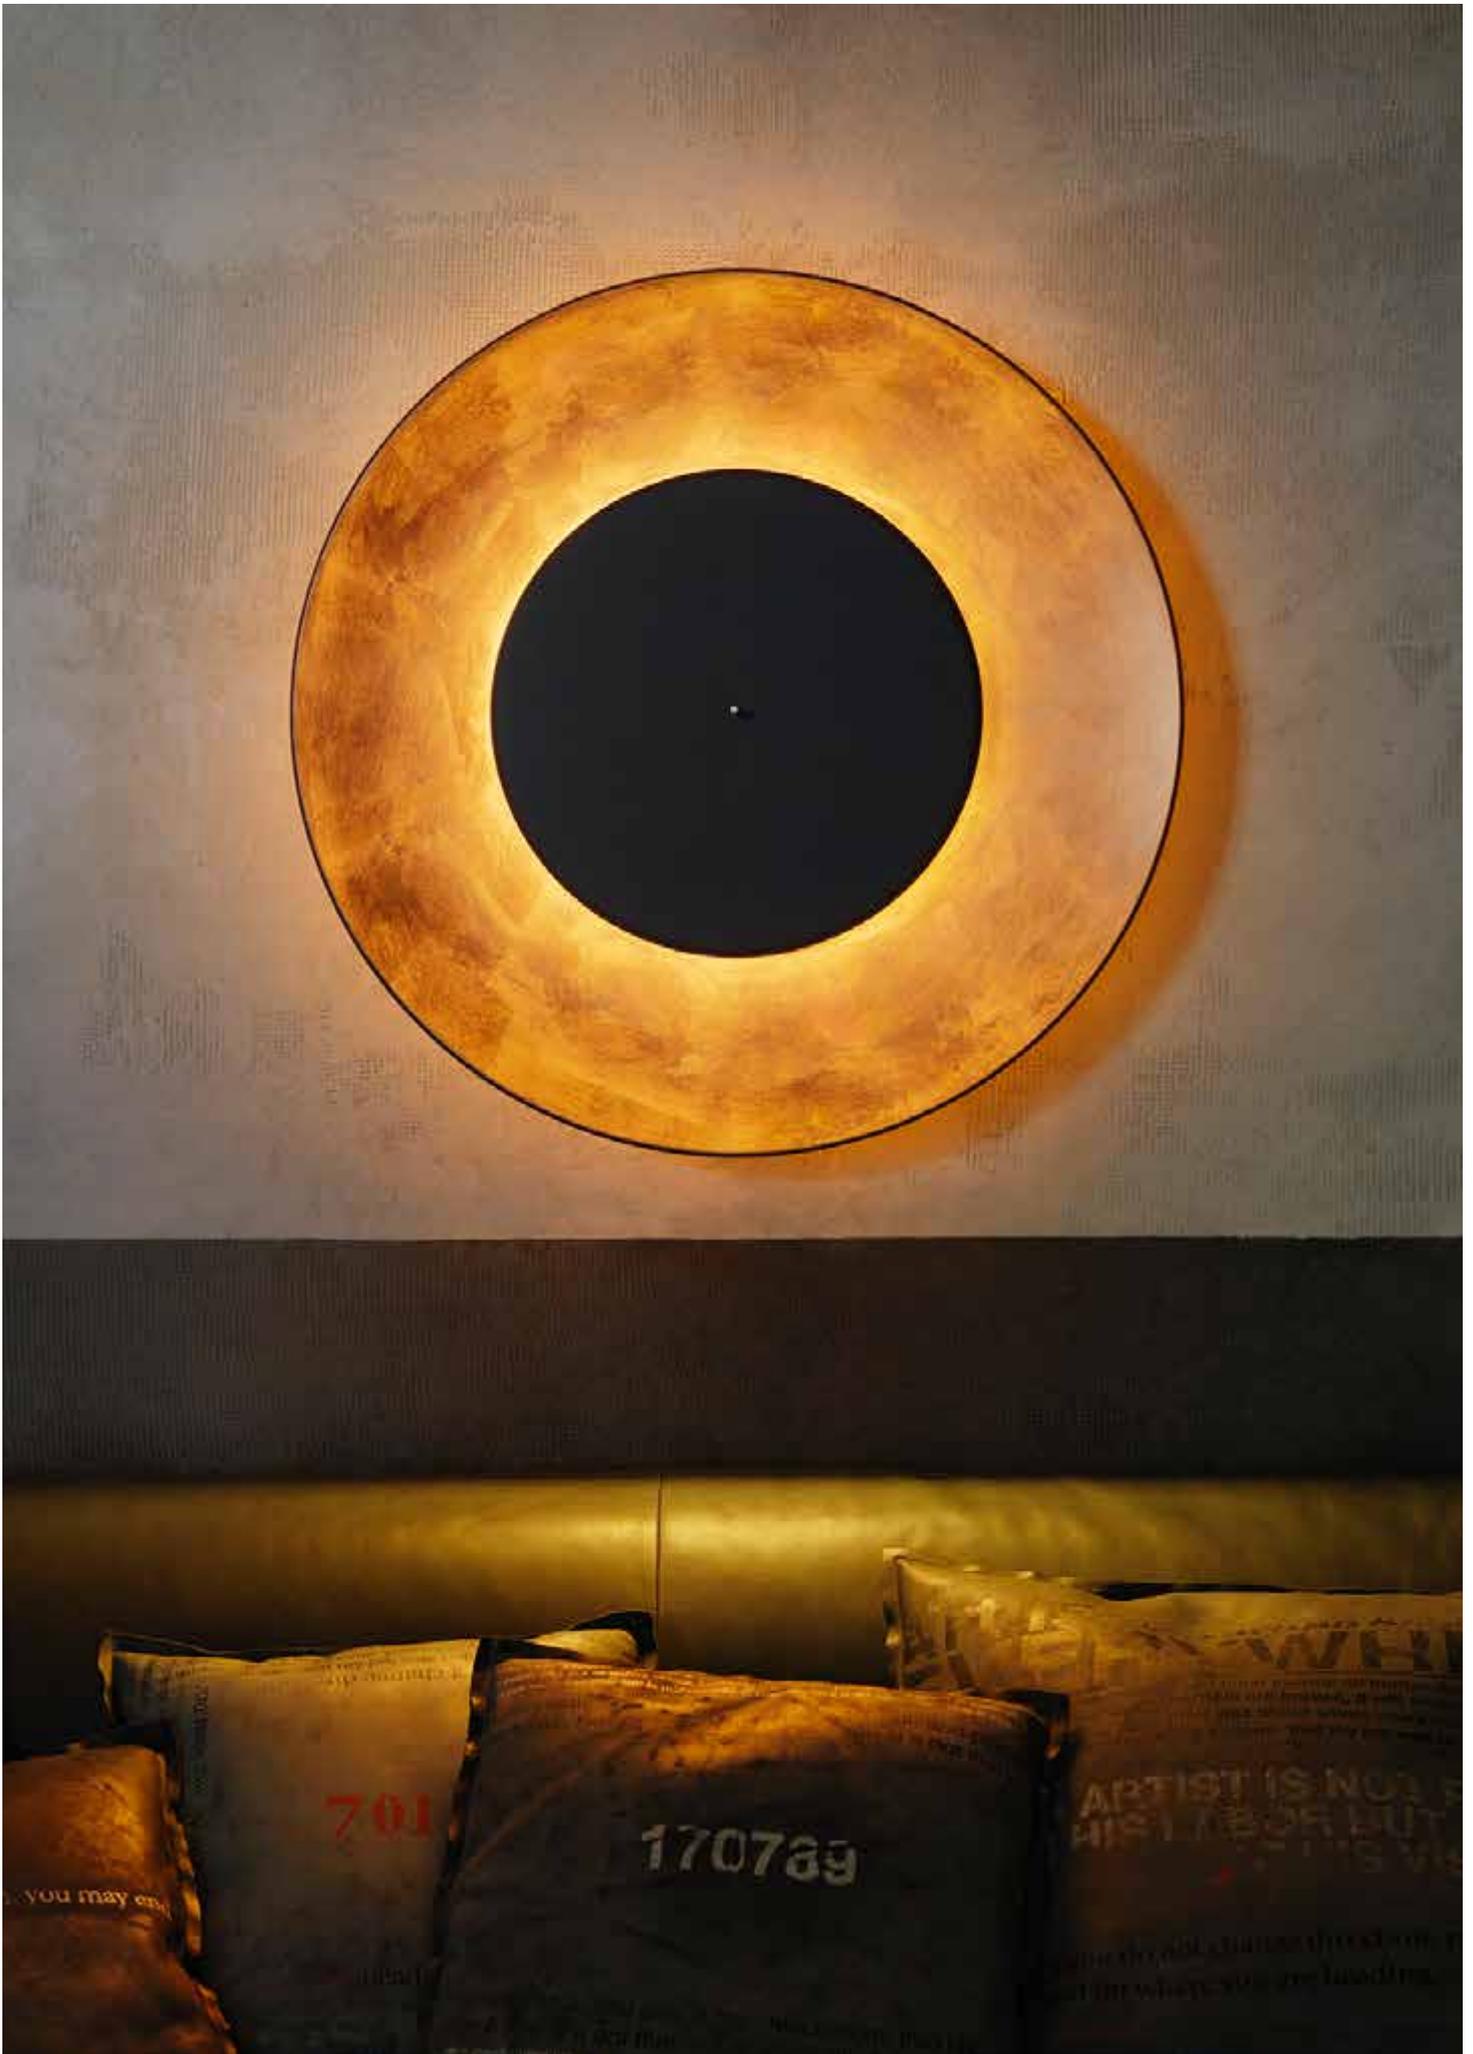

Wall lamp with directional light. Painted metal frame. Thanks to its dual-axis rotation frame, it has the distinguishing feature rotating on both longitudinal and transverse axes, for total light management. The Up/Down movement on the external diffuser widens and narrows the ray of light.

NOBI

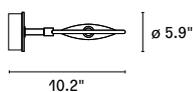

Metis Lighting, 1992

Innovative and contemporary, Nobi is a lamp that offers maximum functionality while maintaining a strong aesthetic presence. Its adjacent convex lenses are held in position by a system of small springs fixed to the metal structure with two pivots, the same ones on which the light source is also mounted. The diffuser can thus rotate on itself and direct the light flow in different directions.

Dimmable diffused light wall lamp. By installing the supplied reflector the lamp produces direct/indirect light that can be directed. Painted metal fitting. Adjustable satinised glass diffuser and anodised aluminium reflector.

AVICO

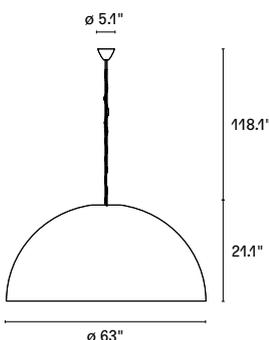

Charles Williams, 2006

Suspension lamp with great scenic impact thanks to the two available diameters (120 and 160 centimetres). Diffuser also available in silver and gold on request. A lower closing disc can be purchased separately to cover the view of the light sources.

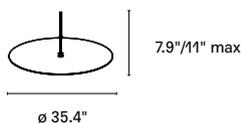

Suspension lamp providing direct and diffused dimmable light. Chrome metal fitting. Polyethylene diffuser. An optional polycarbonate closing disc with telescopic tige and anchor cap can be purchased separately. Steel suspension cable. Transparent power cable. Rosette in metallised thermoplastic material.

BIANCA

Matti Klenell, 2015

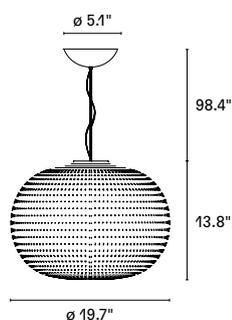

Bianca is a family of luminaires with the decoration on the diffuser surface features an orderly series of shallow delicate grooves etched into the white glass, yielding an effect resembling small footprints on fresh snow. Mouth blown and dipped in acid to obtain the distinctive 'silk effect' typical of fine glassware, Bianca diffusers are available in three different diameters to complete all types of luminaires belonging to the family.

Suspension lamp providing diffused dimmable light. Satin-blown, milk-white layered glass diffuser. Transparent power cable. Painted polycarbonate ceiling rose.

CHANDELIER

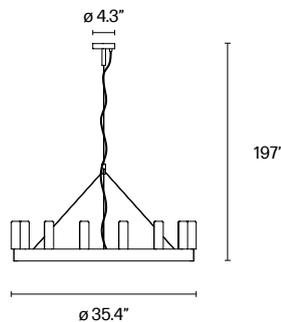

David Chipperfield, 2004

Inspired by the chandeliers of King Arthur's court, the spectacular chandelier designed by David Chipperfield. Available in two colours, in the single or double version with two concentric circles, it illuminates any environment with class and elegance, even the most modern and minimalist.

Suspension lamp with indirect and dimmable light. Painted metal frame. Sandblasted borosilicate glass diffusers. Steel suspension cable. Transparent power cable. Painted metal ceiling rose.

EQUATORE

Gabriele e Oscar Buratti, 2017

A contemporary reinterpretation of the classic lamp with glass shade. While in traditional abat-jours the diffuser houses the light source inside, in this family of lamps the diffuser is paradoxically and suggestively empty and the luminous effect is produced by two luminous discs within a central metal band, visible on the lampshade and recalling the line of the equator.

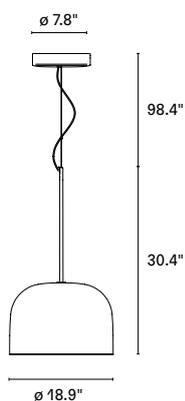

Suspension lamp with dimmable diffused light produced by LEDs inserted inside two overlapping polycarbonate discs. The lower disc produces a downward light emission, the upper disc illuminates the glass canopy. Metal frame. Transparent coloured glass diffuser. Steel suspension cable. Black power cable. White painted metal ceiling rose.

MERIDIANO

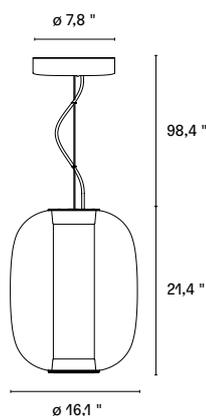

Gabriele e Oscar Buratti, 2020

Passing through opal, coloured and transparent layers, emphasised by the refined curves and magic of blown glass, light is free to create surprising and fascinating effects, patterns and atmospheres. In Meridiano, the vertical cylindrical tube contains and diffuses light in the transparent glass capsule, which defines its refined ovoid shape.

Ceiling light providing diffused/direct light with double switch and partially dimmable. The double switch allows the central (dimmable) and lower part of the diffuser (on-off switch) to be switched on separately. Nickel-plated metal frame. External diffuser in blown glass. Internal diffuser in internally painted Pyrex glass. Steel suspension cable. Black power cable. Painted metal ceiling rose.

PINECONE

Paola Navone, 2016

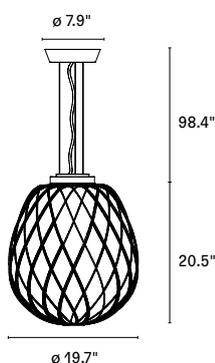

Pinecone is a pendant and floor lamp with a diffuser made using the ancient technique of caged blown glass. The master glassmaker blows the glass bubble into a metal cage, which partially contains its expansion, creating a tension effect between the glass and the cage. The latter is further enhanced by a galvanic treatment that makes it shiny and brilliant.

Suspension lamp providing diffused dimmable light. Diffuser in blown opaline acid-etched or transparent glass. Galvanized metal cage and base. Steel suspension cables. Transparent power cable.

SETAREH

Francesco Librizzi, 2017

The lamp consists of a sphere magically suspended within a slender metal structure. An interplay of masses and circular trajectories generates a balanced pattern of gravitational dynamics. The light emanating from the sphere spreads over the surrounding space and irradiates the frame. The reflections of the metal make the light field visible, the space influenced by the light, its aura.

Suspension lamp with diffused and dimmable light. Galvanized metal frame. Diffuser made of opaline blown glass with satin-finish. Steel suspension cable. Black power cable. Painted metal ceiling rose.

With glass diffuser

THALEA

Paolo Rizzato & Francesco Librizzi, 2023

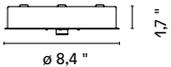

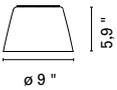

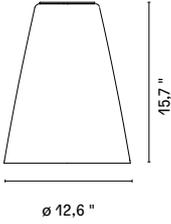

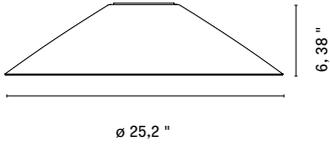

Thalea, created by Paolo Rizzato and Francesco Librizzi, is a series of coloured glass and aluminium lampshades. Thanks to an innovative joint, it offers configurations inspired by Renaissance art. With two light sources, it combines design and functionality, reflecting FontanaArte's style.

Suspension lamp with direct and indirect light, aluminium frame and coloured glass or aluminium diffusers. Available in 4 glass shapes and 1 in black aluminium. Two light sources: diffused and spot light, integrated and dimmable LED, height adjustable.

VASO FONTANA	p. 222
TAVOLINO 1932	p. 224
TAVOLO CON RUOTE	p. 226

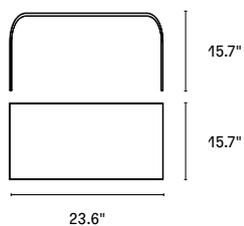

FONTANA

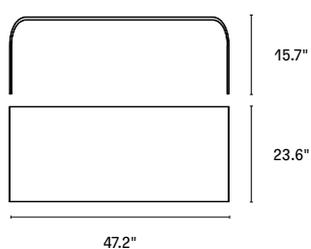

Pietro Chiesa, 1932

Designed by Pietro Chiesa, it was an extraordinary piece of essentiality and elegance. This coffee table is made from a double curved single piece of thick glass (15 mm).

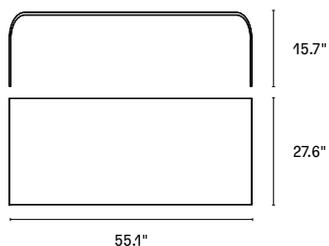

Coffee table made of curved and ground float-glass.

Code	Material	Colour	Prezzo no IVA Price VAT excluded

FONTANA

FontanaArte Design Lab, 2023

An artistic hand-blown glass vase inspired by the iconic FontanaArte abat-jour, model 1853 designed by Max Ingrand in 1954, of which it is a faithful miniature replica. FONTANA is a precious object in milky white frosted glass that decorates the space with elegant simplicity and is suitable as a unique flower vase, for creating an intimate atmosphere as a tealight candle holder or concealing an air freshener.

Vase of blown glass with satin-finish.

1932

Gio Ponti, 1932

This coffee table was designed by Gio Ponti and is made from two discs in float glass, 15 mm thick. The structure is in brushed nickel-plated brass.

Coffee table with two disc made of float-glass.

Code	Material	Colour	Prezzo no IVA Price VAT excluded
F2710TB150TR10	Glass, Metal	 Transparent, Nickel	\$ 3.934.00

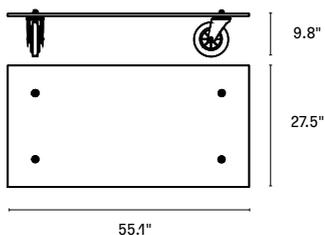

TAVOLO CON RUOTE

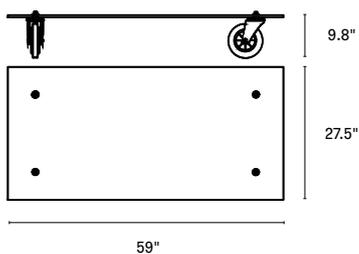

Gae Aulenti, 1980

This wheeled table replaces the factory trolley's wooden shelf with a chunky sheet of beveled glass – a tribute to the company's production history – and fits free-rolling industrial wheels. The nature of the object and its intended use are transformed by replacing just one simple part.

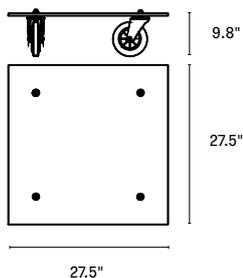

Coffee table with ground float-glass top. Industrial wheels with painted metal bracket

TECHNICAL NOTES

LEGEND	p. 170
SPARE PARTS	p. 171
PACKAGING MEASUREMENTS AND WEIGHT	p. 174

LEGEND

Mark of certification for the american market that certifies that the product is conform to the North American standards.

The procedure for shaping glass is blowing: free or moulded. The blowing technique can be varied by using moulds made of iron, bronze or wet wood. Into these forms the heated glass mass is blown and shaped by expanding. Glassblowing is an ageless art.

DIMMER TECHNICAL NOTES

Dimmer: dimmable fixture by means of a switch situated on the lamp structure or on cable (infrared, microswitch, push button, slider control, touch).

Dimmable (yes): dimmable fixture by means of a remote switch able to manage dimmable sources (halogens, fluorescents, LED Retrofit).

Dimmable (Push): dimmable fixture by means of a remote switch able to manage Push Drivers.

Dimmable (1-10V): dimmable fixture by means of a remote switch able to manage 1.10V Drivers.

Dimmable with phase cut dimmer: dimmable fixture only with dimmer for LED modules for mains voltage.

Dimmerable TRIAC: The latest TRIAC dimmers can dim LED lamps
